

# SEO REPORT

## Goal

---

Establish a foundational and conversion-optimized online presence for Goutham Jewellers' 'All types of gold jewellery' category within 6 months, by implementing comprehensive product page content and technical SEO enhancements, aiming to achieve top 20 rankings for primary transactional keywords 'antique jewellery' and 'platinum jewellery' and secure a measurable initial online conversion rate.

## Gaps

---

- **Id**

gap-0

**Type**

Keyword

**Description**

The primary product page at <https://gouthamjewellers.com> is entirely blank from a content and functional perspective, as per the provided data (Word Count: 0, no H1, Title, Meta Description, CTAs, or Schema). This results in an absolute failure across all measurable aspects compared to any functional e-commerce competitor. Every competitor page will inherently outperform it by merely existing and displaying basic product information and purchase options.

**Fix Plan****What**

Implement full content and functional parity with competitor basic requirements.

**Why**

The current state means 100% loss of potential conversions and SEO value. Competitors universally offer product titles, descriptions, images, prices, CTAs, and internal links. Without these, the page cannot compete.

**Where**

Every core section of the product page: title, body, CTA area, navigation.

**How**

Add a unique, keyword-rich title, a compelling product description (minimum 200 words), 3+ high-quality images, clear pricing, a prominent 'Add to Cart' button, and functional internal links to categories and related products. Ensure proper H1 and H2 usage for content hierarchy.

**Competitor Gap**

- **Gap Type**

Keyword

**Description**

The primary product page at <https://gouthamjewellers.com> is entirely blank from a content and functional perspective, as per the provided data (Word Count: 0, no H1, Title, Meta Description, CTAs, or Schema). This results in an absolute failure across all measurable aspects compared to any functional e-commerce competitor. Every competitor page will inherently outperform it by merely existing and displaying basic product information and purchase options.

**Fix Plan**

- **What**

Implement full content and functional parity with competitor basic requirements.

**Why**

The current state means 100% loss of potential conversions and SEO value. Competitors universally offer product titles, descriptions, images, prices, CTAs, and internal links. Without these, the page cannot compete.

**Where**

Every core section of the product page: title, body, CTA area, navigation.

**How**

Add a unique, keyword-rich title, a compelling product description (minimum 200 words), 3+ high-quality images, clear pricing, a prominent 'Add to Cart' button, and functional internal links to categories and related products. Ensure proper H1 and H2 usage for content hierarchy.

**Priority**

high

- **What**

Integrate robust trust signals directly on the page.

**Why**

Competitors actively build trust with reviews (Tarinika.in), certifications (Bhimagold.com, Efficdiamonds.com), and clear contact/brand information. The primary page's current state generates zero trust, leading to immediate abandonment.

**Where**

Near product details, below the fold, and in the site's footer/header.

**How**

Add customer review snippets with star ratings, badges for industry certifications (e.g., 'BIS Hallmark Certified'), and clear links to 'About Us' and 'Contact Us' pages. Ensure these are easily verifiable and authentic.

**Priority**

high

- **What**

Implement comprehensive Product Schema markup.

**Why**

Competitors use schema to dominate search engine results with rich snippets for price, availability, and reviews. The absence of schema on the primary page means it is actively losing visibility and click-through rates to competitors.

### **Where**

Within the HTML head or body of the product page.

### **How**

Develop and integrate JSON-LD schema for 'Product', including 'name', 'image', 'description', 'sku', 'brand', 'offers' (with 'price', 'priceCurrency', 'availability'), and 'aggregateRating' properties. Validate using Google's Rich Results Test.

### **Priority**

high

## **Keyword Cluster**

- **Cluster Name**

Antique Jewellery Collection

### **Keywords**

- buy antique gold necklace
- traditional Indian antique jewellery
- antique style bangles
- antique jewellery designs
- antique jewellery
- vintage gold earrings

### **Tag**

Transactional

- **Cluster Name**

Platinum Jewellery Elegance

### **Keywords**

- shop platinum rings for women
- modern platinum chain designs
- platinum wedding bands
- platinum jewellery price
- platinum jewellery
- minimalist platinum earrings

### **Tag**

Transactional

- **Cluster Name**

Jewellery Care & Trends

### **Keywords**

- how to clean gold jewellery at home
- latest jewellery fashion trends
- what is BIS hallmark for gold
- choosing the right jewellery for occasion
- difference between 18k and 22k gold
- jewellery investment tips

### **Tag**

Informational

### **Strategy**

#### **Step 1: Content Dominance**

##### **Competitor Issue**

Competitors like Tarinika.in and Bhimagold.com clearly define their products with descriptive titles, H1s, and initial paragraphs, immediately communicating value to users and search engines. Goutham Jewellers' product page currently provides no such information.

##### **Evidence From Scrape**

###### **Target Page**

The product page at <https://gouthamjewellers.com> fails to communicate WHAT the product does, WHO it is for, or WHY it is superior due to a complete absence of visible text, product title, H1, meta description, and images. (goal\_clarity score: 0).

###### **Competitor Page**

Tarinika.in explicitly displays product names (e.g., 'Mugdha Antique Choker Set'), detailed descriptions, and high-quality visuals. Sayarjewellerysaidapet.com uses 'Sayar Jewellery Saidapet | Gold & Diamond Jewellery in Chennai' as title and 'Welcome to Sayar Jewellery Saidapet' as H1.

## **Fix Plan**

- **What**

Rewrite the Title Tag to be descriptive and keyword-rich.

### **Why**

Competitors (e.g., Tarinika.in, Sayarjewellerysaidapet.com) clearly title their products and use H1s to immediately communicate product identity, a critical first step for user understanding and SEO. Without this, the page is invisible and meaningless. The target page's goal\_clarity score is 0 due to an absence of a unique and descriptive product title.

### **Where**

Title Tag

### **How**

Create a unique
